

KAVI SHAH

Aurangabad, Maharashtra | P: +91 9763199319 | kavi3006@hotmail.com | www.linkedin.com/in/kavi-shah/

SUMMARY

Computer Science Engineering graduate with hands-on experience in full-stack web development, blockchain technology, and AI/ML applications. Proven track record through internships at SettleMint and Zaalima Development, developing production-grade applications including e-commerce platforms, NFT smart contracts, and AI-powered finance management systems. Proficient in JavaScript, React.js, Python, Solidity, and cloud platforms. Strong problem-solving abilities with experience in agile development workflows, REST API development, and database management. Seeking software development opportunities to leverage technical skills in building scalable applications and contributing to innovative technology solutions.

EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY

Bachelor of Technology

Major in Computer Science Engineering

Cumulative GPA: 7.34/10

Relevant Coursework: Software Engineering, Operating Systems, Algorithms, DBMS, Artificial Intelligence, Machine Learning, Data Analysis

Vellore, Tamil Nadu

Sept 2021 – June 2025

DEOGIRI COLLEGE

State Board (HSC), Aggregate: 87.3%

Aurangabad, Maharashtra

March 2020 – March 2021

AGRASEN VIDYA MANDIR

CBSE Board, Aggregate: 72.8%

Aurangabad, Maharashtra

April 2018 – March 2019

WORK EXPERIENCE

SettleMint

Blockchain Intern

New Delhi

Sept 2023 – Nov 2023

- Gained hands-on experience with SettleMint's low-code blockchain platform to build production-grade blockchain applications.
- Collaborated with the blockchain team to develop and deploy thoroughly tested ERC721 standard smart contract for an NFT crowdfunding project for a client in Dubai.
- Collaborated with senior and lead developers to understand and apply the Software Development Lifecycle (SDLC).
- Assisted in project execution, support, and documentation to ensure successful delivery.
- **Programming language:** Solidity
- **Tools and Frameworks:** Hardhat, OpenZeppelin, Metamask

Zaalima Development

Web Development Intern

Bengaluru, Karnataka

May 2025 – Aug 2025

- Built a custom e-commerce web application (React.js) with design upload, product previews, shopping cart, Stripe checkout, and order tracking.
- Developed a blogging platform with rich-text editor, SEO-friendly URLs, Google AdSense integration placeholders, and interactive features (comments & likes).
- Designed an Admin Dashboard UI for managing products, inventory, orders, and content moderation.
- Implemented JWT authentication, REST APIs and MongoDB Atlas for backend services.
- Collaborated in an agile sprint-based workflow, delivering full-stack features and deployment-ready builds.
- **Programming language:** JavaScript, CSS
- **Tools and Frameworks:** React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication

PROJECTS

PORTFOLIO WEBSITE

A personal portfolio built to showcase projects, skills, and experience as a web developer.

- Built using React + Vite, featuring a responsive and modern user interface optimized for all devices.
- Highlights key projects, technical skills, and includes a contact section for easy outreach.
- Deployed on Vercel with GitHub integration for continuous deployment and version control.

WEALTHWISE: MONEY MANAGEMENT SYSTEM

Finance management system using AI and clustering algorithms for personalized expense tracking.

- Built a personal finance app using Streamlit with an interactive dashboard for tracking income, expenses, and trends.
- Implemented K-means clustering for user segmentation and personalized financial insights.
- Developed an NLP-based chatbot to provide tailored financial advice and spending recommendations.
- Processed transactional data to enable accurate expense tracking and budget management.

PERSONALIZED MUSIC RECOMMENDATION BASED ON FACIAL RECOGNITION (FaceTune)

A project creating a music recommendation system based on real-time facial emotion recognition.

- Developed a Python-based system that detects facial emotions in real-time using Convolutional Neural Networks (CNNs).
- Utilized deep learning models for accurate emotion classification.
- Integrated the system with the Spotify API for personalized music recommendations.

SKILLS

TECHNICAL SKILLS

Programming Languages: HTML, CSS, JavaScript, C/C++, Python, Java, SQL, Solidity

Libraries & Frameworks: React, Vite, Responsive Design, Hardhat, OpenZeppelin

Tools & Platforms: Git, GitHub, Vercel, Visual Studio Code, Jupyter Notebook, RStudio

Cloud Platforms: Google Cloud, Oracle Cloud

Other Tools: Cisco Packet Tracer, Metamask

ADDITIONAL SKILLS

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Time Management, Adaptability

Languages: English, Hindi, Gujarati, Marathi

CERTIFICATION

- **Front End Development Libraries**
freeCodeCamp, Issued May 2025
- **Responsive Web Design**
freeCodeCamp, Issued May 2025
- **Google Cloud Computing Foundations Program**
Google Cloud, Issued 2023
- **Java Development on Oracle Cloud**
Oracle Cloud, Issued 2023
